

RESEARCH BIBLIOGRAPHY

Request for Information

An updated research bibliography will be compiled as a result of the 2008 Congaree National Park Research Symposium. In order to ensure we have the most current and complete reference list possible, we ask you to submit a list of past studies and publications you have completed based on data from Congaree.

Justification

The last research bibliography was published in 1979 as part of justification for protecting the area we know now as Congaree National Park. An updated compilation of relevant publications is a critical tool to inform and direct future research at the Park.

TYPES OF INFORMATION REQUESTED

- Citations of published scientific literature based on work conducted at Congaree National Park (annotated citations or bibliography preferred)
- Electronic copies or hard copies of published literature based on work conducted at Congaree National Park (electronic/digital versions preferred)
- Citations for published literature relevant to floodplain forest ecosystems and forested wetland habitats
- Proposed future research needs appropriate for better understanding the dynamic floodplain ecosystem at Congaree National Park

HOW TO SUBMIT INFORMATION

Please send requested information to:

Theresa Thom – RE: RESEARCH BIBLIOGRAPHY

Congaree National Park, 100 National Park Road, Hopkins, SC 29061

- Please provide electronic documents and citation lists on a CD or DVD. Please make sure your contact information is visible on the exterior of the CD (you can mail or bring to the symposium)
- Hard copies of literature can be either brought to the symposium, or mailed to the above address.
